

# Hulahoop

## Petunia grandiflora F1

Annual

Natural, Pellet

Hulahoop Series is an extra early flowering grandiflora type of Picotee Petunia. All colours have excellent outdoor performance, being highly floriferous and compact in habit.

- Early flowering picotee petunia
- Grandiflora type, large-flowered bicolors, measuring 7.5 cm (3 inches) in diameter
- Highly floriferous with compact habit
- Proven performance over many years in packs and gardens
- Sensitive to growing conditions and under certain conditions, may show some variation in the colour pattern as with other bicolored petunias
- Care should be taken to provide sufficient moisture and nutrients

*Petunia grandiflora pendula* F1

Annual

Pellet

- Spreading and cascading type of petunia, particularly suitable as a groundcover for landscapers
- Its spreading and cascading habit can easily cover an area of 90 cm (3 feet)
- Tremendous flower power
- Early to flower in the spring and continues to flower even under the short days of autumn
- Flower size is approximately 5-7.5 cm (2-3 inches) in diameter
- Flower petals have a shiny iridescent waxy texture, which repels water
- Recovers very quickly after a rain storm
- Produces new flowers at axillary nodes, not just the terminal, thus providing continuous flowering in the center of the plant
- Great for hanging baskets
- Salt tolerant, so superb for seaside/coastal plantings
- Explorer Pink and Explorer Purple were winners of two out of six RHS awards of Garden Merit in 2006
- Pelleted form only

# Merlin

## Petunia multiflora F1

Annual

### Natural, Pellet

Merlin Series was bred to perform in various climatic conditions. Flower size is about 6.5 cm (2.5 inches) in diameter with a better rain resistance and weather tolerance than grandiflora Petunias. Merlin's are free flowering and in the garden the plants retain their compact habit during the entire flowering season.

- Best rain and storm resistant multiflora series
- Mid-sized flowers in a beautiful colour range
- Easy, uniform and quick in production
- Slow to stretch: allows for high density growing
- Known for excellent greenhouse performance
- Dwarf, compact plant habit retained throughout the flowering season
- Excellent series uniformity
- Free flowering
- Holds its shape even after rain
- Plant height is about 25 cm (10 inches)
- Pink Morn is a 1996 Fleuroselect Quality Award Winner
- Blue Morn is a Fleuroselect Quality Award Winner and an All America Selections Winner
